

SILL GATE OPERATIONS

Vessel access is via an automatic flap gate, 25 metres in width, enabling boats to enter or leave when the tide exceeds height of +3.9m above chart datum.

- **OBSERVE TRAFFIC LIGHTS**

- RED – DO NOT PROCEED**

- GREEN – SAFE TO PROCEED**

- Do not navigate near the flap gate until the **green lights are illuminated**
- When entering and/or leaving the marina, keep to a sensible 'slow' speed and keep 'right' in accordance with normal navigational practice. **Contact marina office on VHF CH80.**
- Observe sill depth gauges.
- Observe vessels entering or leaving the marina in opposite direction to your intended course. where practically possible judge the cross point to be away from the gate aperture.
